Trimble Connect

CLOUD-BASED COLLABORATION FOR MEP CONTRACTORS

Connect the right people to the right data at the right time with Trimble Connect, a cloud-based collaboration platform designed specifically for the construction industry. With Trimble Connect, your entire organization has a single source of truth for all project data–ensuring teams have the information they need to deliver on time and on budget.

Open any model type, PDF or other documents in one platform and get the benefits of BIM and file sharing without specialized software and skills. By connecting information and teams, Trimble Connect reduces rework, RFIs and costly schedule delays.

Unlock project data for your entire organization today.

TRIMBLE CONNECT IS INCLUDED IN THESE TRIMBLE MEP SUBSCRIPTIONS:

▸ VDC Pro+

▸ Estimation Desktop Essentials

▸ AutoBid Estimating Essentials

▸ Accubid Classic Estimating Essentials

▸ Estimation MEP

▸ Fabrication Essentials

### BIM FOR YOUR ENTIRE ORGANIZATION

Share models without costly specialized CAD software or training, so all teams have access to the latest information they need. Experience the fastest load times in the industry whether you're at the construction site or in the office. With Trimble Connect, you always have access to the latest models with mobile, browser and mixed reality applications.

AVOID COSTLY DELAYS

Identify clashes, assign actions and track progress within one tool. By consolidating all project communications from emails and PDF comments into Trimble Connect, you can view tasks at a glance and keep all project participants informed of their tasks with automated emails.

Benefits

▸ **Stronger collaboration** between project teams, offices or remote teams.

▸ **Reduce your software costs** by using Trimble Connect for users who need to view and annotate on existing models.

▸ **Maximize transparency** across the project by enabling stakeholders to see issues in the model and know who is working to address each issue.

▸ **Eliminate costly servers** and reduce risk of natural or cyber threats to your organization's records.

▸ **Coordinate models in real time,** eliminate the need for paper drawings in the field and collaborate within the model not an in-person meeting.

▸ **Prevent rework** before it is built by making your project information accessible to the entire project team

Trimble Connect

CLOUD-BASED COLLABORATION FOR MEP CONTRACTORS

ELIMINATE REWORK AND PAPER DRAWINGS

By viewing models or drawings from a laptop, tablet or smartphone in Trimble Connect, you can be sure you're constructing the model with the latest annotations to avoid costly mistakes and delays. Quickly collaborate with the office from the field by uploading images to Trimble Connect and assigning a task to a team member from one platform.
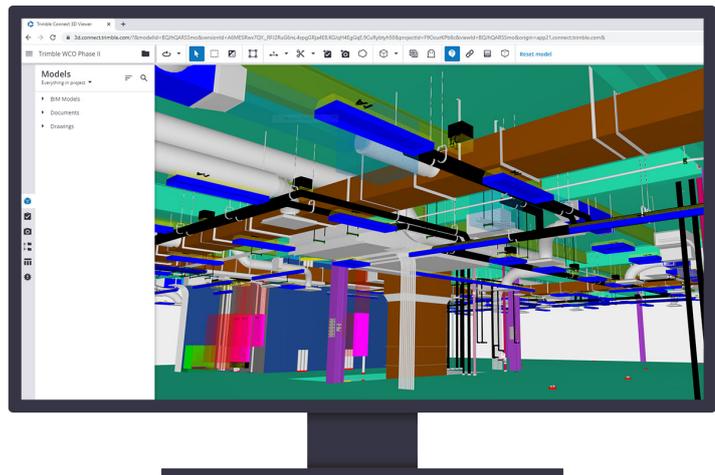

CONNECT WORKFLOWS AND TEAMS

With all your data in one secure location you can streamline workflows throughout the project, enabling stronger collaboration across functional areas. Project estimators, detailers and project managers can complete their tasks keeping project files in the same system – streamlining handoffs and prioritization of tasks between teams.

ALL DATA IS SAFELY STORED IN THE CLOUD

Reduce your business' hardware, maintenance and storage costs by uploading and securely storing Revit, PDF and other file formats to Trimble Connect. Data-rich building model file sizes are very large and difficult to store but not with Trimble Connect. Trimble Connect leverages cloud technology to offer users unlimited storage to store and archive all project data safely in case of litigation.
